Personal Statement:

I am a 19 year old Cape Cod native who has grown up around boats my entire life. I currently attend Stonehill College where I run Division 1 Track and Field while double majoring in criminology and political science. I am hoping to pursue a job inside the FBI. I have ample experience with customer service dealing with people from all ages in different scenarios. My biggest hobby is fishing that I learned from my grandfather. From a young age I had fallen in love with fishing and boats. He taught me how to drive and everything I know about anything marine related. I even helped him to fix an engine on his last boat. Boating has been my life and something that I love to do for sport or just for fun. When I am not working, I love to workout on the track or in the gym so I can reach my goals at the collegiate level. Overall I am very driven as evidenced by my ability to hold a high GPA and be Captain of several sports teams while being able to get everything done as efficiently and proactively as possible.
